Sentina

Smart Rechargeable LED Light

LED92M

User's Manual

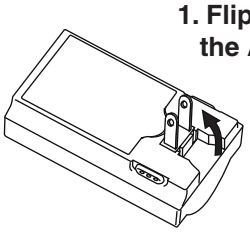
Sentina is on when the power is out !

Your Sentina is 4-way light;

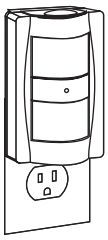
1. **Power Failure Light**
2. **Motion Detector Light**
3. **Photoelectric Night Light**
4. **Emergency Flashlight**

Getting Started

1. Flip up the AC plug



2. Plug the unit into a power socket and let it charge for 12 hours.



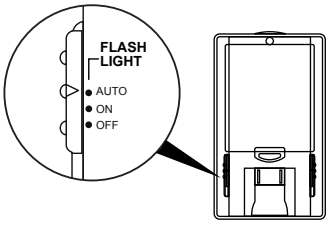
That's It!
Your Sentina is now ready to perform.

Using Sentina as a Power Failure/Motion Detector Light

Never Leaves You In The Dark!
Sentina turns itself on when power failure occurs. No need to look for matches to light the candles.

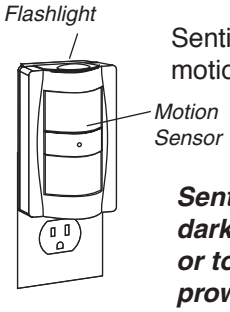
No Need To Look For Light Switch!
When the unit is plugged in, it will detect motion within about 12 feet and activate the top flash light for safety. It triggers to switch the light on by phasing in the spot light and stays lit for 1 minute.

1. Set "FLASHLIGHT" Switch to "AUTO"



Note: *If the batteries are charged, the flashlight turns on, as soon the switch is set to "AUTO"*

2. Plug Sentina into AC Outlet



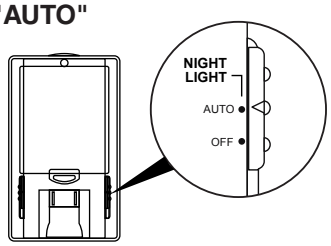
Sentina starts detecting motion at dusk.

Sentina is perfect for dark halls, stairwells, or to guard against prowlers.

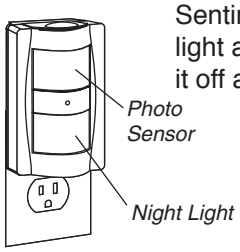
Using Sentina as a Photo-electric Night Light

Energy Saver - Automatic Night Light
When the switch is set on "AUTO", the unit functions as dusk to dawn night light. Set to "OFF", the unit's night light function is disabled.

1. Set "NIGHT LIGHT" Switch to "AUTO"

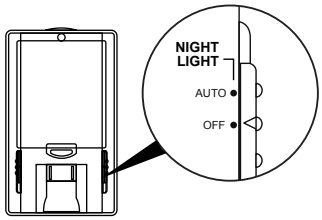


2. Plug Sentina into AC Outlet



Sentina turns on night light at dusk and turns it off at dawn.

To keep Night Light OFF, set "NIGHT LIGHT" Switch to "OFF"



Using Sentina as an Emergency Flashlight

No Batteries/Bulb Replacement Needed, It's A Rechargeable LED Flashlight!
Sentina is also an emergency flashlight that just won't quit.

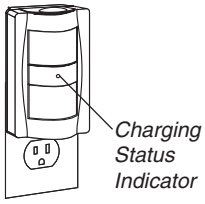
1. **Just unplug it from the socket**
   (Make sure that Flashlight Switch is at "Auto")
2. **Take it Anywhere, It will last over 8 hours!**

   For continuous use, set the "FLASHLIGHT" switch to "ON"
3. **Plug Sentina back into AC Outlet After use to charge**

   Turn the "FLASHLIGHT" switch to "AUTO" and keep Sentine plugged so Sentina is always ready!

Recharging Sentina

Always keep Sentina on AC Outlet



Battery Status:
RED = Low
YELLOW = Charging
